Platforms/Tooling: AWS (S3/EC2), Docker, Git, Github Actions, Vercel, Netlify, Vite, Webpack, CI/CD, Jira, Figma

Others: Firebase, MongoDB, REST, GraphQL, Jest, Cypress, Sentry, Strapi CMS, Swagger, Postman, GenAI, Cursor, LLMs, AI Agents

Experience

Idzigns Creative Solutions

(Remote) Hyderabad, India

Senior Software Engineer

July 2025 - Present

- Engineered **Chittibob**, a B2B AI SaaS enabling businesses to automate services, and create conversational chat bots.
- Improved app performance by 40% by adding ai assistant with voice/text interactions streamed through WebSockets.
- Developed a Chat SDK, enabling chatbot embedding into any application with a single script tag.
- Leveraged OpenAI Whisper to enable bots to understand & respond to voice queries, & integrated Razorpay payment.
- Migrated a React code implementation into a generic, frontend schema-driven architecture, creating a scalable and structured flow for custom hooks, state management, and API integrations, with separation of concerns through abstraction of handling logic.

Duple IT Solutions

Mohali, India

Software Development Engineer- 1

Dec 2023 - June 2025

- Led the development of modern, high-performance Single Page Applications (SPA) using React.js, Next.js and Node.js.
- Optimized performance, reducing load times by 30% using code-splitting, lazy loading, caching and virtualization.
- Built **Unison**, a dashboard for a school management system with role-based access control, and leveraged Shadcn UI.
- Implemented authentication and security measures using JWT and OAuth, and integrated the Stripe payment gateway.
- Delivered a real-time chat system with document upload, Firebase push notifications, and internationalization (i18n).
- Conducted code reviews to improve quality and participated in Agile/Scrum methodologies for efficient development.

IT Waves

Chandigarh, India

Frontend Developer

Nov 2022 - Nov 2023

- Worked on the **Setmore** SaaS scheduling platform, enhancing the service module with effective UI/UX for 50k+ users.
- Crafted custom reusable components with efficient state management and TypeScript, and optimized form handling.
- Worked on the **Florasense**, a plant-care platform featured in Shark Tank, and improved UI with Framer Motion.
- Improved SEO using Server-Side Rendering & Static Site Generation, created structured sitemaps & meta tags.
- Collaborated with the backend team to integrate RESTful APIs and third-party services for dynamic data exchange.
- Troubleshooted the interface using end-to-end testing tools for debugging and performance monitoring in production.

Projects

Hire Next Gen

[Link](#)

- Built an AI-powered platform to automate end-to-end interview preparation, mock interviews
- Implemented AI-driven question generation from resumes and, screen/audio recording and live transcription.
- Integrated LLM-based scoring to provide actionable feedback and performance evaluation for users.

Education

Panjab University- DAV College

Chandigarh, India

Bachelor of Computer Applications

Aug 2018 - Jun 2021
